SPECIALISED IPL & LASER TREATMENTS

IPL (Intensed Pulsed Light) - Is a Medical device treatment for Permanent Hair removal; Acne and acne scaring; Skin Rejuvenating; Vascular lesions (such as thread veins and port wine stains); Pigmented lesions (freckles, age spots), Sun-damaged skin and Rosacea.

The Ellipse IPL machine has CE and FDA certification as well as from the S.A.Radiation Control Board.

Nd-yag Laser – is a Medical device treatment for Permanent hair removal (all skin types); Pseudo folliculitis Barbae (ingrown beard);

Photo coagulation and Hemostasis of Pigmented and Vascular lesions especially Spider veins; treatment for Acne, Rosacea, warts, scars, wrinkles, stretchmarks and Onychomycosis (fungal infection in nails). Nd-Yag lasers are able to target only blood vessels in the skin without damaging the surrounding tissue.

IPL and Nd-Yag Laser treatments are done by Elma McKenzie – a qualified Radiographer and Somatologist with extra qualifications in Medical Aesthetic treatments. Any uncertain medical case on the skin, will be referred to a Medical Doctor.
