

### TCA Peel ( Trichloroacetic acid, Glycolic acid)

TCA peeling is strictly reserved for clients who need more aggressive peels and have been prepared for physical peeling of the skin. Indications would include: Epidermal pigmentation irregularities and scarring- where previous superficial peels have been unsuccessful.

TCA Peeling **R 950.00**

### REJUVENATING FACIAL TREATMENTS:

Each Facial Treatment is performed by using 4-6 different specialised Beauty machines. After all facial treatments (depending on the skin type), an extra treatment with a Galvanic machine, High Frequency, Oxygenating mask, Serum and Moisturizer with SPF is included.

**Non Surgical face lift:** This unique combination of wave-forms and micro-current frequencies produces instantly visible results, as muscles are gently tightened and toned, lines & wrinkles are softened and smoothed.

**Enzyme Rejuvenating:** Enzyme therapy helps to breaking down dead skin cells containing keratin protein. It regulates and enhances optimal skin functioning and resulting in younger, smoother looking skin almost instantly.

**Microdermabrasion:** Abrasive exfoliation for resurfacing and regeneration of skin. Thereby refining and improving the skin's appearance and texture.

**Sonophoresis (Ultra sound):** Ultra sound waves are proven to increase the skin's permeability by up to 800%. The skin absorbs the active Skin Rejuvenating gel & serum to rejuvenate, moisturize and then leaving the skin velvety soft with a translucent glow.

**Vacuum Suction treatment:** Is a mechanical lymphatic drainage treatment. It stimulates the lymphatic system and aids in the removal of skin impurities, blackheads & pimples.

### Vacuum Suction Deep cleanse facial
